

Spin-It

With the Perma-Cote **Spin-It**, Perma-Cote can be tightened much faster than with conventional tools. Because the **Spin-It** never touches the coating, damage to the conduit is eliminated.

CATALOG #	DESCRIPTION
SPIN-IT-3/4	3/4" SPIN-IT
SPIN-IT-1	1" SPIN-IT
SPIN-IT-1-1/4	1-1/4" SPIN-IT
SPIN-IT-1-1/2	1-1/2" SPIN-IT
SPIN-IT-2	2" SPIN-IT

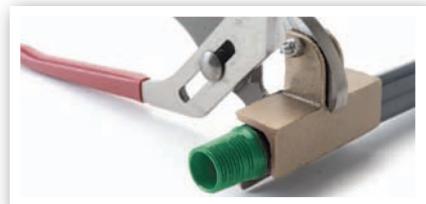

Plasti-Socket

Plasti-Socket is a fiber-glass encapsulated 3/8" drive socket for use with the square fiberglass encapsulated U bolt and beam clamp nuts used in the Perma-Cote conduit support system. The **Plasti-Socket** helps avoid coating damage from metal sockets, pliers or wrenches.

CATALOG #	DESCRIPTION
PLASTISOCKET-3/8	3/8" Plasti-Socket

Z-Wrench

Z-Wrench features extra wide jaws which spread the clamping force, enabling the tool to grip without marring the surface of the conduit. The "V" shaped upper jaw allows **Z-Wrench** to accommodate a wide range of conduit sizes. Shallow grooves in the upper and lower jaws provide an excellent grip.

CATALOG #	DESCRIPTION
JPZ1	1/2" - 1-1/4" Z-Wrench
JPZ2	1-1/2" - 2-1/2" Z-Wrench

JAWS 3

JAWS 3 are a set of aluminum-nickel-bronze vise jaws designed to replace the regular jaws in a RIGID #23 or #40-A pipe vise. They completely protect the exterior coating from damage caused by the vise jaws when cutting or threading.

CATALOG #	DESCRIPTION
JAWS3-#23	JAWS3 #23 PIPE VISE
JAWS3-#40-A	JAWS3 #40-A TRIPOD PIPE VISE

Half Shell Clamps

Half Shell Clamps are designed to cover a large surface area when clamping conduit, especially in a chain vise. This allows for a strong grip without damaging the exterior coating.

CATALOG #	DESCRIPTION
HLF-SHL-CLP2	2" HALF-SHELL CONDUIT CLAMP
HLF-SHL-CLP2-1/2	2-1/2" HALF-SHELL CONDUIT CLAMP
HLF-SHL-CLP3	3" HALF-SHELL CONDUIT CLAMP
HLF-SHL-CLP3-1/2	3-1/2" HALF-SHELL CONDUIT CLAMP
HLF-SHL-CLP4	4" HALF-SHELL CONDUIT CLAMP
HLF-SHL-CLP5	5" HALF-SHELL CONDUIT CLAMP
HLF-SHL-CLP6	6" HALF-SHELL CONDUIT CLAMP

Hickey

The **Perma-Cote Hickey** is a special bending tool with a 40 mil PVC coating which reduces the possibility of damage during conduit bending.

CATALOG #	DESCRIPTION
HICKEY	1/2" & 3/4" Conduit Bender

Touch Up Compounds

Perma-Cote Touchup Compounds are available to repair minor damage to the exterior PVC factory coating. The exterior PVC touchup compound is gray and available in a 12 oz. aerosol can, and a pint can with brush-top applicator. The approved thread compound touchup compound is available in a pint can with a brush-top applicator. See the installation section of the buyers' guide for more information on using the Perma-Cote touchup compounds.
